W. B. Scholl was nominated for re-election as Commissioner for the First District, a just recognition of his faithful services.—Herald, Oct. 8.

In voting for Commissioner there are many things to be considered. The question naturally arises, do we want change? After carefully considering the matter, we must say that we see n rson why a change should be made This county is now deeply interested in railroad matters, and many thou-sands of dollars in bonds are now in the State Treasury awaiting the com-pletion of the T., S. & W. R'y. Comissioner Scholl has given positive surance that not one dollar of these onds shall be turned over to the com pany or any person until the cars are running into Salina. We all know Mr. Scholl's honesty and his tried faith-fulness. Can we afford to change? As a matter of business he has a right to complete the work he has commenceand our people, for their own interest should aid him — Herald, Nov. 5th. di

What is to prevent the establishment of such a factory in our county?

It is the opinion of many, Good Deaeon Stacy, that it is just as right and honorable for the county commissioners to give the county printing to whom they please as it is for the city souncil to act in a similar manner. I the city council has a right to "reward their friends," the county commissioners certainly have a right to do so. And we do not believe that the Good Deacon Stacy has ever objected to the city conneil rewarding Stacy.

Mr. Smith stated to Mr. Bender that the company had de cided to make Salina the eating station in place of Abilene-to be discontifued. He gave as his reason that as the time table now is Salina is reached at the most suitable eating hours for all the trains. He said the depot building at the track would be commenced at once, the hotel building now there to be moved so near the depot building as to allow of a covered pasageway from one building to the other, and thus protect passenger from inclement weather. The old, old play of "Uncle Tom's labin" was made delightfully fresh and original by " Draper's Uncle Tom Cabin Troupe," which exhibited at the Opera House last Monday night. The rained blood hounds and the trick lonkey were new features which did nuch in adding to the interest of the play. We never saw before the character of " Lawver Marks" so wellsus tained as on Monday night. His every motion brought out long and prolonged applause. "Ophelia," the Yankee aunt, was exceedingly well played, While "Topsy" was "thrilling" in her make up, she fell short of the standard in some respects. "Uncle Tom" was good, and so "Legree." The plantation melodies by "the four" were very fine. Thus taken altogether it was about the best presentation of this thrilling play we have ever witnessed. The hall was pretty well filled, probably it was near a \$200 house. Judging from the good natured and could not fail to be fruitful of good. faces we saw on every hand, the audiwith the play.

> the river last Sunday, about 2 o'clock p. m. C. J. Ahlberg, a clerk in Campbell & Tuthill's store-aged about 28 years, broke through the thin ice beneath the iron bridge while engaged in skating. There were only three or four skaters near when the accident happened, but the cries of Ahlberg for help brought a large crowd of people to the river. Conscious that he could not swim, losing his presence of mind and becoming frantic, and no doubt chilled through, he could do nothing for himself, and sank into the waters to rise only as a corpse. Everything was done that could be with the appliances at hand, to save him, but it was impossible. John Donegan broke through the ice in his attempts to help him and had to swim to the shore Boards were thrown out upon the ice, but too late to reach or help him. Finally a boat was brought from Samuel Jones' place and put into the watter, and Messrs. Taylor Miller and D. R. Wagstaff susceeded by the use of a rake in bringing Ahlberg's body to the surface but a little way from where he went down. The water was about 15 feet deep at that place. The body was taken to A. M. Campbell's residence. Ahlberg had no relatives here. A dispatch was sent to relatives in Iowa, informing them of the sad occurence and asking whether the body should be buried here or sent to them. Ahlberg was formerly a clerk for Ferlen & Lecksell, but for the last six months has been in Campbell & Tuthill's store.

Quite a destructive fire occurred in this city last Saturday night, soon after 12 o'clock. A hostler at the Couse stable is supposed to have been the first person to discover the fire, which was then confined to the building on the west side of Santa Fe avenue owned by Mrs. M. J. Doyle-and he immediately gave the alarm. By the time the crowd had assembled and the boys of the fire company had arrived, the interior was all on fire. The building contained nothing except the bar fixtures lately used by Gust. Schultz. who is now in jail. The fire communicated with Pat. O'Donnell's gun show on the south, and Charles Daniels' broom factory, north, and the block of buildings extending from the stone saloon building to the vacant lot south of Clarkson's livery stable was swept away. There were really only three buildings covering a lot and a half, all one story and of frame -but there were five store rooms. The first room on the south was the Eggleston picture establishment: next door the gun shop; next to that the Doyle at the Tabernacle, Sunday night. The building, then the broom factory, and last the little room occupied by Chas. Daniel as a residence. Fortunately there was very little wind and the progress of the fire was so moderate as to enable the occupants of the rooms to save nearly everything. The flames and heat made a flerce onslaught upon Clarkson's livery stable but the vacant 25 feet, the use of salt on the roof, the Babcock's stream, the livery stable hose and the good work of firemen and citizens, saved the buildingthough the fire caught in the roof two St. Louis, Jan. 23.—The man who was shot by Ford Parker, clerk at the St. George Hotel, Dallas Texas, on Saturday night last, while he was trying to rob the office safe, died yesterday. A. L. Williams and H. P. Dillon. of the Union Pacific, were in town last Monday, arranging for the payment of damages sustained by property owners along the proposed new line through town. After consulting with several of the property owners and their agents, these gentlemen left town, leaving all matters pertaining to the affair with Mr. J. C. Bender, who is endeavoring to have an amicable adjustment of all differences. As soon as the damage question is finally settled, and deeds to property condemned given, grading and track-laying will commence at once. The property owners thus far have not been disposed to contest for fancy prices for their property, and the company, on the other hand, are not disposed to force down much on prices. W. E. Weil receives \$1,800 for his hide warehouse property north of the bridge; John Geis & Co., \$2,000 for the Athletic Hall property and lots south of the Plow Factory : Addison & Seaman, for two lots adjoining, receive two lots next south in exchange; R. S. Champlin receives \$200 for damages done to his property : J. R. Chapman claims \$1,100 damage to his property, but the company has not yet agreed to give it. The depot building, to be similar in architecture to the one at Beloit, will probably be erected very close to Iron Avenue, on the south side. On next Monday the railroad officials will be here to pay off the parties damaged, where the amounts have been agreed upon. Railroad Items.

The Sentinel last week announced that the party of the B. & M. railway surveyors were again encamped here and under instructions to continue the survey on the lower line, and suct was the information given us by Engineer Dunn, in charge of the survey ing party. We learned, that work was later being done on the upper route, and that gentleman explain Mr. M. W. Ensign, Assistant Chief Engineer, was here but a few days ago, and instructed him to survey the upper route first (through the gap), and Mr. Dunn informs us that has made the preliminary survey finding the grade very much better than he expected. The work of locasecond survey, their headquarters will ting the permanent line has com-menced and before this reaches our readers will probably have, been fin ished, after which the other route will be run.—Minneapolis Sentinel.

We had a pleasant call from our old friend Hon O. P. Hamilton, of Salina. yesterday. He was feeling good over the success of the new railroad that he has labored so hard for, and as we walked along the splendid track or which a train of cars was already doing construction service, it was pleasant to hear him discourse on wha Mr. Hamilton is right, as every one in Leavenworth realizes, the roa is going to be of great service. In this connection it is only fair to allade to the part that Mr. Hamilton has taken in securing this road. At this time last year he was at work surveying in the western counties for the Topeka & Southwestern R. R., talking it up, speaking at the school houses in favo of voting aid, in fact he put in all the winter months working hard and watching every point. As a railroad man he is a success. He has lots of energy, is the best surveyer in Western Kansas, and while he has enthusiasm, he has also, practical common sense, which is better. A sad case of drowning occurred at The surveyors of the K. P. have re turned from the upper Spillman country and left this place yesterday and are now surveying a route up the Saseem not to be satisfied with the grade on the Spillman route.-Lincoln Center Register, Jan. 13.

We understand there are four corps of engineers at work on this road be tween Leavenworth and Salina. One corps has resumed work here at Couneil Grove. It is the understanding now that a contract is to be let at an early date, for the grading of some 15 or 20 miles of the road from here west.—Council Grove Republican.
